Productsheet **Balance in growth**

Bio-Terro

Natural plant conditioner, stronger plants with less Fungi !!
Bio-Terro is allowed in **MPS** & **GLOBAL**G.A.P and is a completely MRL free product.
The Maximum Residue Limit is the legal maximum residue limit (residue) of a substance in or on foods.

Reset and reboot the rhizosphere of your crop!

During the growing season there will be times when for unknown reasons the crop will decrease production. Even with the right fertilizer the crop is not growing well. This is a telltale sign that a negative balance originates around the rhizosphere of the plant. There are simply too many negative bacteria and fungi present, which secrete toxic toxins. The effect is that the useful microbiological environment will become out of balance. If this balance cannot be reversed, you should use Bio-Terro. Bio-Terro contains unique components that suppress bacteria and fungi in the rhizosphere, binds them, and subsequently rinses them out. Bio-Terro gives as it were a reset and reboot for your jammed crop.

Bio-Terro contains a unique blend of natural pro-hormones, antimicrobial essential oils and fatty acids. The product should be administered as a shock treatment, of course of several days, which thereafter should be stopped.
After a treatment with Bio-Terro we recommend to apply Carbo-Max and Q-55. With these two products useful bacteria and fungi are stimulated in their growth, and as a result the balance around the rhizosphere will eventually be restored.

GRENETH

Effects and advantages
• Binds and flushes out bacteria and fungal spores
• Biological reset of the soil
• Bio-Terro has no MRL and no waiting time, and therefore harvesting can be done immediately.
• It is impossible for fungi to build up resistance against Bio-Terro.
• Bio-Terro can be used in any crop, in both biological and integrated cultivation systems.

Recommended rates
Use Bio-Terro in a concentration of 100 ml per 100 liters of water.

Dosage per hectare:

Substrate	**Soil**
2 to 3 liter	4 liter
